PROFESSIONAL CLEANING PRODUCTS

Cleaning with **professional power.**

Professional products for every cleaning and hygiene need of businesses, from laundries to food production.

PRODUCT CATALOGUE

titankimya.com

From laundries to food production, **a single brand** for the cleaning and hygiene needs of businesses.

01 Who we are

TITAN develops and manufactures professional cleaning products for laundries, commercial kitchens, general cleaning, floor care, personal cleaning, carpet care, food hygiene and special industrial applications. We formulate our products around quality, effectiveness and user safety, so that they deliver consistent results even under demanding conditions.

02 Our vision

To be one of the brands that come to mind first and shape the sector in national and international markets for professional cleaning and hygiene, with innovative formulas, consistent quality and a reliable approach to service.

03 Our mission

To offer effective, safe and environmentally responsible products together with the right application support for every cleaning and hygiene need of businesses; to keep raising our quality standards while creating lasting solutions that increase our customers' efficiency.

Our values

Quality

Consistent, high-performance formulas and controlled production.

Safety

User health and surface safety are the priority of every product.

Sustainability

Environmentally responsible production, a clean world for future generations.

Solution partnership

Technical support at your side in choosing and applying the right product.

TITAN

ARES MATIK L12

ENZYME-BASED, BLEACH-FREE POWDER MAIN WASH DETERGENT

With enzymes | Bleach-free | Coloured textiles

A main wash powder with added enzymes and no bleach, developed for industrial laundries. Effectively removes protein-, fat- and starch-based stains. As it contains no bleach, it cleans coloured and delicate textiles in depth without causing colours to fade.

Packaging	10 kg
Barcode	8684020321349
Units per case	1

Washing | Clean laundry | Stain removal

pH 10 (Acidic – Alkaline)

TITAN

ARES MATIK EXTRA L13

ENZYME-BASED POWDER MAIN WASH DETERGENT WITH TAED AND BLEACH

Enzymes + TAED | Whites and coloureds | Heavy soiling

A powerful main wash powder with added enzymes and TAED, developed for industrial laundries. Thanks to its bleaching action, it provides in-depth cleaning and hygiene on white and coloured textiles. Effectively removes protein-, fat- and starch-based stains. Delivers high performance even at low temperatures.

Packaging	10 kg
Barcode	8684020321349

TITAN

Selection guide

WHICH MAIN WASH POWDER FOR WHICH TEXTILE?

Our main wash powders are aimed at different textile and soil types according to their enzyme and bleach content. Choosing the right product improves both cleaning performance and textile life.

Product	Enzyme	Bleach	Recommended use
Ares Matik L12	✓	–	Coloured and delicate textiles
Ares Matik Extra L13	✓	TAED	White and coloured, heavily soiled
Sapphire Matik L9	–	TAED	White textiles

Depending on the type of stain, can be used together with auxiliary wash products (p. 9) and spot stain removers (p. 13). Consult our technical team for dosing.

TITAN

CONTRA L14

LIQUID STAIN-REMOVING AND BOOSTING AUXILIARY WASH PRODUCT

Oxygen-based | Stain remover | Suitable for dosing

Suitable for use with dosing systems in all types of industrial washing machine. Oxygen-based. Suitable for wash water above 40°C. Shows its optimum bleaching effect as the temperature rises.

Packaging	5 kg	20 kg
Barcode	8684020321387	8684020321370

TITAN

LIKIT CHLOR L6

CHLORINE-BASED BLEACHING AND STAIN REMOVAL PRODUCT

Chlorine-based liquid | White textiles | Provides hygiene

A chlorine-containing bleaching product prepared for use in commercial laundries and in hotel and hospital laundries. This product is compatible with all kinds of white and colourfast textiles.

Packaging	4.95 kg	19.80 kg
Barcode	8684020322445	8684020322438
Units per case	4	1

Automatic dosing | Clean laundry | Stain removal

pH 13 (Acidic – Alkaline)

TITAN

Selection guide

OXYGEN OR CHLORINE BLEACH?

Bleach should be chosen according to the colour of the textile and the wash temperature. Oxygen-based bleaches can also be used on coloured textiles, while chlorine-based bleaches are suitable for white and highly colourfast textiles.

Product	Active	Form	Textiles
Oxy Plus L10	Oxygen	Powder	Whites and coloureds
Rapid L11	Chlorine	Powder	White
Likit Chlor L6	Chlorine	Liquid	White and colourfast

Do not mix chlorine and oxygen bleaches in the same wash step. Do not use chlorine products together with acidic products.

TITAN

STAINSOLVE B L15

OIL AND PAINT REMOVER

Oil and grease | Paint and ink | Spot application

A spot stain remover developed to remove oil, grease, paint and ink stains from fabrics. Applied directly to the stained area before washing. Suitable for industrial laundries, hotels and textile businesses.

Packaging	750 ml
Barcode	8684020322001
Units per case	12

Stain removal | Textiles | Spot application

pH 8 (Acidic – Alkaline)

TITAN

STAINSOLVE EX L19

RUST AND STAIN REMOVER

Rust stains | Metal marks | Spot application

A powerful product specially formulated to effectively remove tough rust and stain marks from fabrics. Suitable for industrial laundries, textile factories and large-scale cleaning services.

Packaging	750 ml
Barcode	8684020322049
Units per case	12

Stain removal | Textiles | Spot application

pH 1 (Acidic – Alkaline)

TITAN

Stain guide

WHICH STAINSOLVE FOR WHICH STAIN?

The Stainsolve range consists of spot stain removers applied directly to the stained area before the main wash. Choosing the product that matches the source of the stain gives the best result without damaging the textile.

Stain type	Product
Oil, grease, paint, ink	Stainsolve B L15
Blood, tannin, tea, coffee, fruit	Stainsolve C L16
Rust and metal-based stains	Stainsolve EX L19

Before application, test colourfastness on a hidden area of the fabric. Move the item to the main wash without letting the product dry on the fabric.

TITAN

Selection guide

THE RIGHT PRODUCT FOR LIMESCALE AND RESIDUE

In the kitchen, limescale and residue are removed with different products depending on the type of equipment. Choosing the right product protects both the cleaning result and the surface of the equipment.

Limescale formation depends on water hardness; in hard-water areas descaling should be repeated more often. Limescale that builds up in boilers and heating elements lowers heating efficiency and increases energy consumption.

Application area	Product	Page
Dishwasher, bain-marie, heating element	Anti Lime 011	19
Tea urn and water boiler	Aqua Shine G9	20
Espresso group and portafilter	Clean Coffee K10	21
Milk system and steam wand	Clean Milk K11	21
Sink, hob, stainless steel stains	Cream G7 · G10	20

Do not mix acidic descalers with chlorine products. For coffee machines, also follow the machine manufacturer's cleaning instructions.

TITAN

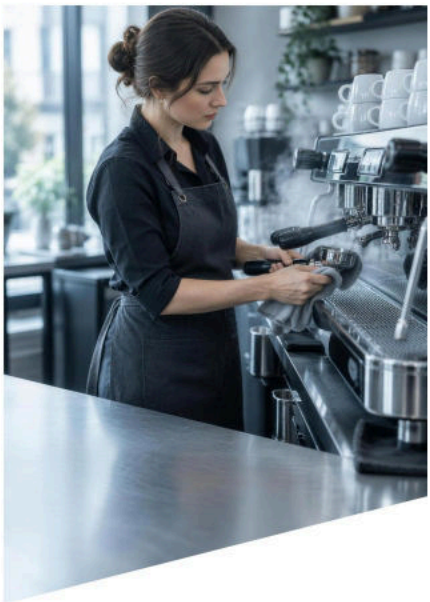
Coffee machine care range

Café · Restaurant · Hotel



From espresso to milk foam, **dedicated care** for every point.

The taste of coffee starts with a clean machine. Coffee oil that builds up in the group head and protein that dries in the milk line show in the taste and aroma of every cup. The K series deals with these two points separately.

01 **Group head and portafilter** — K10
Clean Coffee K10 · coffee oil, espresso particles and odour

02 **Milk system and steam wand** — K11
Clean Milk K11 · dried milk and protein residues

03 **Boiler and heating element** — G9 · p. 20
Aqua Shine G9 · limescale and mineral deposits

Also follow the cleaning steps in your machine's user manual.

TITAN

Application guide

THE RIGHT PRODUCT FOR CARPET WASHING

In carpet and upholstery washing, the product is chosen according to the application method. In machine washing foam control comes first; in manual washing, rich foam.

Application	Product
Machine washing of carpets and sofas	Spark S6
Manual carpet washing	Carpet Cleaner S5
Foam overflow, wet vacuum	Defoamer C2

Before application, test the colourfastness of the carpet on a small, hidden area. After washing, rinse the carpet thoroughly and leave it to dry.

TITAN

FOOD CARE F6

HIGH-ALKALINE FOAMING CLEANING PRODUCT FOR CARBONISED, BURNT-ON SOILING

High alkaline | Carbonised soiling | Foaming

A high-alkaline foaming cleaning product developed to dissolve the carbonised, burnt-on grease and dirt residues that form on ovens, grills, pans and cooking equipment. Its foam clings to vertical surfaces, extending the contact time. Ideal for food production plants and industrial kitchens.

Packaging	5 kg	20 kg

FOOD CARE F7

SINGLE-STAGE CIP, CRATE, GLASS AND BOTTLE WASHING PRODUCT FOR CLOSED SYSTEMS

Single-stage | CIP system | Bottles and crates

A single-stage washing product developed for the hygienic cleaning of CIP systems as well as glass and plastic bottles and transport crates. Effectively dissolves organic residues, fats and proteins and leaves no residue after rinsing. Ideal for meeting hygiene standards in food and beverage production.

Packaging	5 kg	20 kg

FOOD CARE F30

CHLORINATED AND SILICATED CIP CLEANING PRODUCT FOR CLOSED SYSTEMS

Chlorinated, silicated | CIP system | Metal protection

A powerful chlorinated and silicated cleaning product developed for the effective cleaning of closed systems (CIP) on food and beverage production lines. Breaks down fat, protein and organic soils to provide hygiene within the system. Its chlorine content reduces the microbial load, while its silicate components protect metal surfaces. Fully compatible with automatic cleaning systems.

Packaging	5 kg	20 kg
Barcode	8684020322322	8684020322315

FOOD CARE F9

HIGH-ALKALINE, LOW-FOAM BOTTLE WASHING AND CIP PRODUCT

High alkaline | Low foam | Bottle washing

A high-alkaline cleaning product developed for CIP systems and for glass bottle and plastic crate washing machines in the food and beverage industry. Effectively dissolves fat, protein and stubborn soils. Thanks to its low-foam formulation, it runs trouble-free in pump and circulation systems and leaves no residue.

Packaging	5 kg	20 kg

TITAN

FOOD CARE F60

PHOSPHORIC ACID-BASED CIP CLEANING PRODUCT FOR CLOSED SYSTEMS

Phosphoric acid | CIP system | Limescale and minerals

A powerful phosphoric acid-based CIP product developed for cleaning the equipment used on process lines where hygiene is critical, such as dairy and beverage production. Effectively dissolves mineral deposits, limescale and rust residues. Leaves no sediment in the system and provides hygiene while making surfaces shine. Compatible with automatic washing systems.

Packaging	5 kg	20 kg
Barcode	8684020322360	8684020322353

TITAN

FOOD CARE F65

POWERFUL NITRIC ACID-BASED CIP CLEANING PRODUCT FOR CLOSED SYSTEMS

Nitric acid | CIP system | Milkstone

A powerful acidic, nitric acid-based cleaning product developed to remove mineral deposits, milkstone and limescale residues in closed systems (CIP) on food and beverage production lines. Applied after the alkaline wash; protects stainless steel surfaces by passivating them. Compatible with automatic cleaning systems.

Packaging	5 kg	20 kg

A COMPLETE PRODUCT RANGE FOR CLOSED SYSTEMS

TITAN

CIP cleaning cycle

RECOMMENDED SEQUENCE FOR CLOSED SYSTEMS

In milk, beverage and food process lines, cleaning in place (CIP) is carried out by applying alkaline and acidic steps in a set order according to the type of soil. The cycle below shows the step at which each of our products is used.

1 — Pre-rinse
Removal of loose soil with water

2 — Alkaline wash
Food Care F9 · F30 · F7

3 — Intermediate rinse
Removal of alkaline residue

4 — Acid wash
Food Care F60 · F65

5 — Intermediate rinse
Removal of acid residue

6 — Disinfection
Food Care F20 (peracetic acid)

Need	Product
Foam control (CIP, tunnel washing)	Food Care F25
Bottle and crate washing	Food Care F7 · F9
Mineral deposits, milkstone and limescale	Food Care F60 · F65

Concentration, temperature and contact time are set by our technical team according to the plant's line layout and soil load.

pH scale

HOW TO READ THE COLOUR SCALE ON THE PRODUCT CARDS

The coloured scale in the bottom right corner of each product card shows the pH value between 0 and 14. The vertical line on the scale marks the approximate pH of the product in its ready-to-use solution. The examples below are products from this catalogue.

Acidic — pH 0–6

Limescale, rust, mineral and urine scale removers; CIP acid products. Personal cleaning products are around pH 5.5, in line with skin pH.

Example: Anti Lime D11 · Sanita Extra G6 · Food Care F60

Neutral — pH 7

Daily floor care and the cleaning of glass and delicate surfaces. Does not damage the surface or the polish.

Example: Big Boss G11 · Glass Clean G8 · Otto Lemon C11

Alkaline — pH 8–14

General cleaning, degreasers and soil removers, dishwashing detergents, oven and fryer cleaners and CIP alkaline products.

Example: Mat D4 · Grill K6 · Food Care F80

TITAN

Safe use

GENERAL WARNINGS FOR ALL PRODUCTS

01 Read the product label and the Safety Data Sheet (SDS) before use.

02 Never mix chlorine products with acidic products or with products containing ammonia; toxic gas may be released.

03 Wear protective gloves and goggles when working with concentrated products.

04 Store products in their original packaging, tightly closed, in a cool place and out of the reach of children.

05 Do not exceed the recommended dosage; ask our technical team for support on dosage and application time.

06 On food-contact surfaces, rinse with plenty of water after application unless the product card states otherwise.

Corrosive

May cause skin burns and permanent eye damage. Acidic and strong alkaline products.

Irritant

May cause skin and eye irritation, and discomfort if inhaled.

Flammable

Keep away from heat and open flames. Alcohol-based products.
